INSTRUCTION MANUAL

V2

WARNING

1. This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.
2. Children shall not play with the appliance.
3. Cleaning and user maintenance shall not be made by children without supervision.
4. WARNING: The lamps in this appliance cannot be replaced. Scrap the appliance when the lamps cease to operate.
5. ⚡ Dangerous voltage
6. The instructions for the appliances intended for outdoor use shall include the substance of the following:
WARNING!
An electric shock hazard may exist if water from a garden hose is directed at the insect killer.
When using extension cords, keep the socket-outlet away from moisture and avoid damage to the cord.
7. The appliance is to be kept out of reach of children.
8. The appliance is not to be used in locations where flammable vapor or explosive dust is likely to exist.
9. Do not open or service the device.
10. Do not insert any objects into the vents as it may cause damage and shock.

THANK YOU

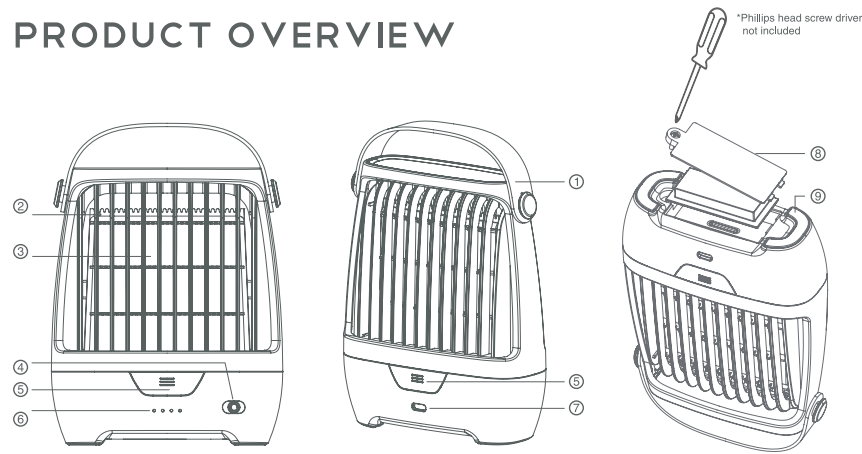

THANK YOU FOR CHOOSING BuzzBGone!

Relief from mosquitoes, black flies, and no-see-ums is on its way! BuzzBGone Zap eliminates annoying, disease-carrying insects using the combined effects of LED light, scented Attractant cartridges, and a mean 750 Volts of electricity. Flying pests don't stand a chance with BuzzBGone around.

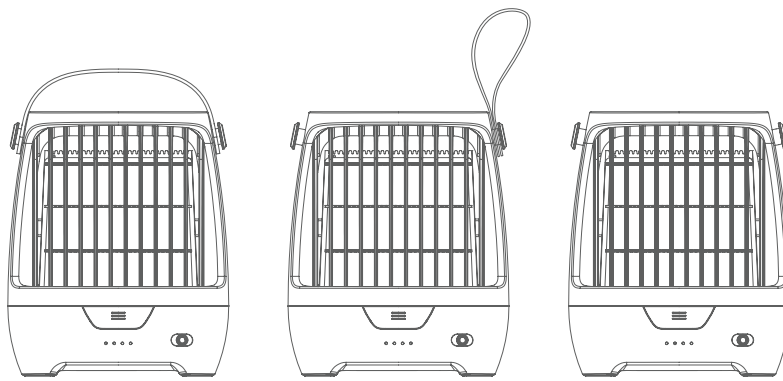

02

03

TIPS:

1. The device can be set to zapper coil + LED attracting light, zapper coil only, or off.
2. To lower battery consumption, don't use the LED light during the day.
3. Clean the grid regularly for best performance.
4. Battery life will vary depending on how many insects are zapped and whether the light is left on.
5. To maximize the BuzzBGone Zap's effectiveness, insert the Attractant mosquito lure into the base compartment. This slowly emits a mild scent that attracts biting insects to the device.
6. Keep the device dry and do not use it near water or in the rain.

GETTING STARTED:

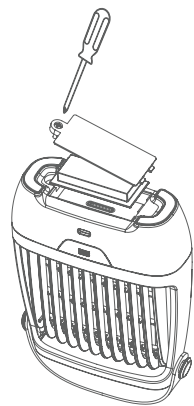

1. Charge the device using the included Type-C charging cable for up to 8 hours (5V 2A). You should get approximately 15 hours of battery life with a full charge depending on its usage.
2. The battery indicator operation:
 - 4 levels (100%, 75%, 50%, 25%)
 - If the indicator light is blinking, the battery is charging
3. Turn on the device by sliding the mode switch left or right. There are 2 settings to choose from:
 - A. Zapper + LED attractant light ON
 - B. OFF
 - C. Zapper ON only

Warning: The zapping coil still holds an electrical charge even when the mode switch is in the OFF position. As a safety precaution, the voltage automatically drops from 750V to 34V when it's off to prevent any accidental shocks while transporting the unit.

04

HOW TO ADD ATTRACTANT

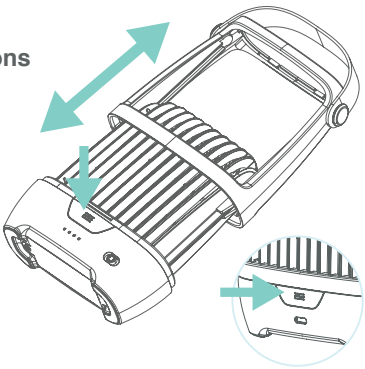

1. Switch the unit off and turn your BuzzBGone Zap over to access the Attractant compartment
2. Use a small Phillips screwdriver to unlock the compartment cover.
3. Take the Attractant cartridge (sold separately) and remove the film to release the scent. Insert the cartridge into the base. The open side of the Attractant cartridge should be facing upwards towards the vent.
4. Secure the Attractant compartment cover back in place. Each cartridge should last approximately 30 days.
5. Wash your hands with soap after installation

CLEANING AND MAINTENANCE:

- The device has a brush built in to sweep off any stubborn residue on the wire grid. Squeeze the two release buttons to access the brush.
- Make sure the device is off before cleaning.
- Avoid spraying any liquid cleaners or using metal objects to clean the device.
- The built-in cleaning brush head has a captive design. Do not completely remove it to avoid damage to your product.

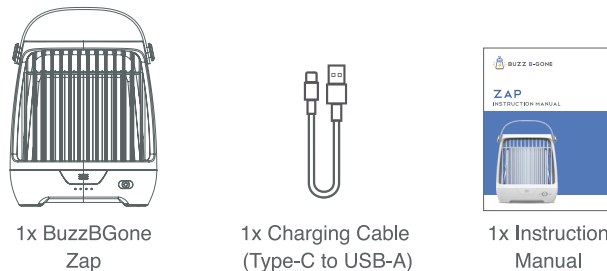

Warning and Safety Precautions

*Press both buttons at the front and back of device

PACKAGE CONTENTS

PRODUCT SPECIFICATIONS

Product Name: Mosquito Zapper
Model: 30569
Product Size: 125 x 52 x 140mm
Input: 5V- 2A
Working Voltage: 5VDC
Working Wattage: 7W
Battery Capacity: 4000 mAh
Zapper: 750 V Max

Make sure to read these instructions carefully before using the device. If you have any further questions about your purchase, our customer service team is happy to help!
