

## SOLAR LIGHT & INSECT ZAPPER

# Instruction Manual

### WARNING

- 1 This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.
- 2 Children shall not play with the appliance.
- 3 Cleaning and user maintenance shall not be made by children without supervision.
- 4 **WARNING:** The lamps in this appliance cannot be replaced. Scrap the appliance when the lamps cease to operate.
- 5 ⚡ Dangerous voltage
- 6 The instructions for the appliances intended for outdoor use shall include the substance of the following:  
**WARNING!**  
An electric shock hazard may exist if water from a garden hose is directed at the insect killer.  
When using extension cords, keep the socket-outlet away from moisture and avoid damage to the cord.
- 7 The appliance is to be kept out of reach of children.
- 8 The appliance is not to be used in locations where flammable vapor or explosive dust is likely to exist.
- 9 Do not open or service the device.
- 10 Do not insert any objects into the vents as it may cause damage and shock.

### PRODUCT SPECIFICATIONS

Product Name: Mosquito Zapper + Garden Light  
 Model: 30570  
 Material: PC / PP  
 Input: 5V- 2A  
 Working Voltage: 5V  
 Working Wattage: 7W  
 Battery Capacity: 4000 mAh  
 Zapper: 750 V Max

02

## Thank you for choosing KANE+LONO Solar Light & Insect Zapper

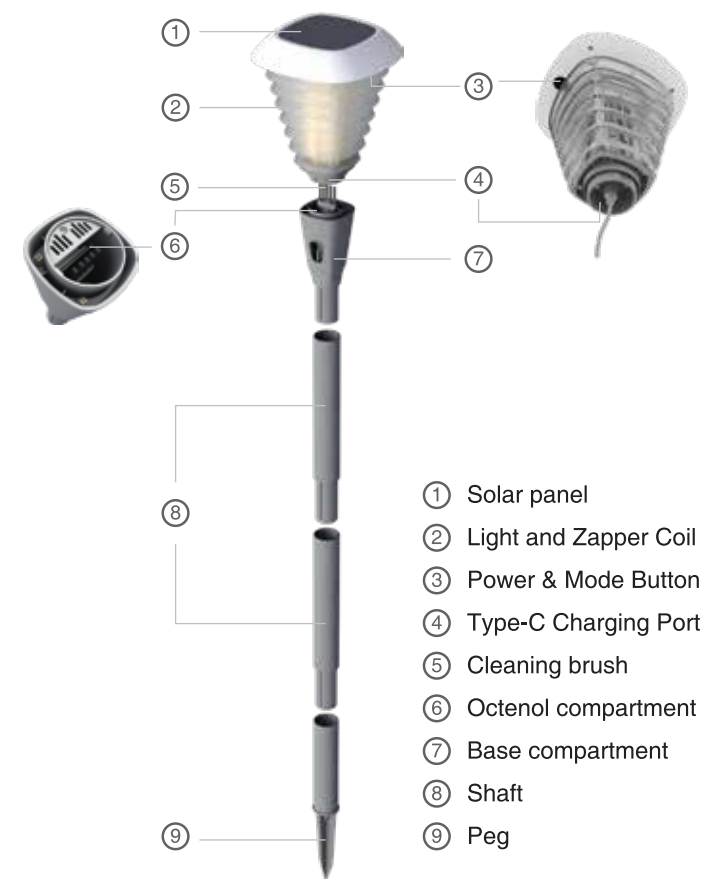

This special solar-powered lamp uses flickering light to mimic a tiki torch flame and enhance your home's visual appeal, and a purple LED light to lure insects towards the zapper.

Kindly read this user manual carefully before setting up your new Light + Zapper. Make sure to keep this document for future reference.

03

### PRODUCT PARTS

04

### HOW IT WORKS

- 1 The solar panel on the light converts solar energy into electrical power and stores it in rechargeable batteries.
- 2 The more sunlight your lawn light gets, the longer it will last throughout the night.
- 3 You can also charge the device using the fast charging Type-C port. One full charge usually lasts for around 18 hours, depending on which light mode is selected and how many insects are zapped.

Note: The Kane Lono Solar Light + Insect Zapper uses LED technology. These kinds of lights are cool to the touch and do not require replacement the way a regular light bulb would.

### PACKAGE INCLUDES

- 1 x Solar Light + Insect Zapper
- 2 x Shafts
- 1 x Peg
- 1 x Charging Cable (Type-C to USB)
- 1 x Cleaning Brush
- 1 x Instruction Manual

05

### HOW TO USE

- 1 Remove the base compartment to access the Type-C charging port. Insert the included cable and charge for 8 hours (5V, 2.0A). When the unit is charging via Type-C, the red indicator light at the port will be ON, when fully charged the red light will be off.
- 2 Assemble the light starting with the main unit, followed by the two shafts and the peg.
- 3 Pick a location that gets direct sunlight for at least 8 hours a day. This is to get the most solar power for the batteries. Drive the peg into the ground.
- 4 Turn on the light by pressing the power button. There are 3 light modes to cycle from, and the zapper stays activated on all three):  
**A.** Flicker Light – Warm LED light that simulates a torch or flame  
**B.** Solid Light – Warm, fixed LED light  
**C.** Purple Light – Purple LED light that attracts insects
- 5 When the battery is low, the unit will power off. If you then press the power button the yellow LED will blink and power off again, this indicates that the battery needs to be charged.

06

### Using Octenol

To attract and zap insects more effectively, you can insert Octenol in the light's hidden compartment.

- 1 Twist the base of the main unit to remove it. Markings will indicate whether the device is locked or not.
- 2 Take a Phillips head screwdriver to loosen and remove the child safety cover.
- 3 Take the Octenol cartridge (sold separately). Remove the film, then insert the cartridge into the base.
- 4 Replace the child safety cover and tighten the screw. Put the base back on the main unit.

07

### SAFETY REMINDERS

- 1 Make sure the device is switched off before cleaning.
- 2 Avoid spraying any liquid cleaners or using metal objects to clean the device.
- 3 We recommend using the included brush to sweep off any residue on the lantern louver and wire grid. The brush can be stored inside the base of the light.
